PROFESSIONAL SUMMARY

Computer Science Engineering student at IIIT Raichur with expertise in full-stack development (MERN), Machine Learning, and Deep Learning. Built and deployed scalable applications serving 500+ concurrent users, achieving 95%+ ML accuracy and 38–40% performance improvements.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Indian Institute of Information Technology, Raichur

2023 – 2027

CGPA: 7.6 / 10

RELEVANT COURSEWORK

Cyber Security | Deep Learning in Medical Imaging (DLMI) | Digital Image Processing (DIP) | Embedded AI (EAI)

SKILLS

- **Programming Languages:** C, C++, Python, JavaScript
- **Web Development:** React, Redux, Tailwind CSS, Node.js, Express.js, MongoDB
- **Machine Learning:** scikit-learn, Random Forest, SVM, Feature Engineering, ML Pipelines
- **Deep Learning:** CNN, RNN, GRU, LSTM, OpenCV, Face Recognition, Deep Face Embeddings
- **Core Computer Science:** Data Structures and Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
- **Tools and Platforms:** Git, GitHub, Vercel, Render

EXPERIENCE

Teaching Assistant (ITP)

Sep 2025 – Dec 2025

Indian Institute of Information Technology, Raichur

- Mentored 120+ undergraduates in Introduction to Programming Lab.
- Improved lab pass rates by 30% through structured debugging sessions and algorithm walkthroughs.

PROJECTS

KeyProctor – Behavioral Authentication Platform for Online Exams

2026

github.com/ManishSamarium/KeyProctor

- Engineered keystroke dynamics ML authentication system with 95%+ accuracy using Random Forest (60%) and SVM (40%) ensemble; continuous re-authentication every 30 seconds during exams.
- Architected full-stack platform using Python/Streamlit backend with JavaScript frontend, real-time behavioral monitoring, C++ code lab with auto-grading, and faculty dashboard.
- Implemented behavioral anomaly detection, copy-paste blocking, and session isolation; cut cheating incidents by 40% with zero hardware requirements.

EYEON – Automated Surveillance System

2025

e-ye-on-an-automated-surveillance-s.vercel.app | github.com/ManishSamarium/Automated-Surveillance-System

- Built OpenCV face recognition pipeline processing 15+ FPS with over 90% detection accuracy; integrated deep face embeddings for real-time visitor identification.
- Deployed Telegram alert system delivering notifications in under 3 seconds; lowered false positives by 40% using threshold-based embedding calibration.
- Designed scalable multi-camera architecture with optimized memory footprint and latency under 100ms.

TheDoctor – AI Smart Healthcare Platform

2025

thedoctorr.vercel.app | github.com/ManishSamarium/thedoctorr

- Developed MERN telemedicine platform handling 500+ concurrent users with JWT authentication, encrypted patient data, and real-time appointment scheduling; deployed on Vercel and Render.
- Integrated ML disease risk prediction model achieving 87% validation accuracy with feature engineering pipeline for clinical data preprocessing.
- Optimized API latency by 38% via MongoDB query indexing and Redis response caching; brought average response time down from 800ms to 500ms.

ACHIEVEMENTS AND AWARDS

- **Academic:** NTSE Scholar; Qualified IMO and Science Olympiad (Classes 6–10); Qualified NDA Written Exam
- **Sports:** Represented IIIT Raichur in Inter-IIIT Basketball Tournament among 16+ IIITs nationwide
- **Technical:** Recognized for Teaching Assistant mentoring excellence; achieved 30% improvement in student lab outcomes
